david@db3.design

I am a Front-End Website Designer, Developer, and Marketer.

EXPERIENCE

DB3 Design LLC, Greenville, SC — *Owner & Operator*

January 2017 - February 2019

I founded, ran, and operated my own freelance design agency. This allowed me to learn lots of new lessons and skills. Including product management, sales, client relationship management, and gain real-world coding experience.

EDUCATION

Treehouse — *Techdegree in Front-End web development.*

June 2019 - November 2019

Mastered all of the skills required to build custom, responsive, and high-quality websites and applications.

PROJECTS

Paper Street Sign Co. — *Website Design*

Transformed client ideas into a fully functioning responsive website to promote their new business and its services.

Southern Appalachian Outdoors — *Website Design*

Helped a small outdoors store get its name online, begin developing its email list, and begin selling products online.

Larue Fine Chocolate — *Website Development*

Created an online store for all Larue Fine Chocolate's delicious treats to be sold online for home delivery or store pick up.

SKILLS

I have a wide range of highly valuable skills.

These skills include **HTML**, **Sass**, **JavaScript**, **JQuery**, **Charts.Js**, **Api's**, **Figma**, and much more.

When combined together, these skills help me create powerful websites and applications.

BACKGROUND

I have spent the better part of five years learning, growing, and refining my extensive range of technical skills. With a wide range of experience and expertise, I can add value to almost any web project.

Whether it is designing a site from scratch, fixing JavaScript bugs, or optimizing pages for search. I am sure that I have the skills to take your project or team to the next level.
